## PROFILE

B.E. student in Computer Science (Artificial Intelligence & Machine Learning) with hands-on experience in Generative AI, Computer Vision, Robotics, and Autonomous Systems. Skilled in PyTorch, Large Language Models (LLMs), Agentic AI, Explainable AI, and Retrieval-Augmented Generation (RAG). Passionate about building AI-powered systems and autonomous technologies that solve real-world problems.

## EDUCATION

|                                                                                                                                                       |                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Maharaja Institute of Technology Mysore</b><br><i>Bachelor of Engineering in Computer Science (Artificial Intelligence &amp; Machine Learning)</i> | Mysore, India<br>2023 – 2027 |
| <b>Pre-University Education Board, Government of Karnataka</b><br><i>GopalaSwamy Shishuvihara Institutions (Science Stream)</i>                       | Mysore, India<br>2021 – 2023 |

## TECHNICAL SKILLS

**Programming Languages:** Python, C, JavaScript

**Web Development:** HTML, CSS, React.js, Next.js

**ML/DL Frameworks:** PyTorch, TensorFlow, Keras, Scikit-learn, LangChain, LangGraph

**Backend & Deployment:** Flask, FastAPI, Django, Django REST Framework, REST APIs, Docker, Git

**Databases:** MongoDB, SQLite, Firebase, Supabase, postgresql

**Core AI Areas:** Machine Learning, Deep Learning, NLP, Generative AI, Computer Vision, CNN Architectures, Agentic AI

**Applied AI Skills:** Model Training, Fine-Tuning, Retrieval-Augmented Generation, Prompt Engineering, Explainable AI

**Robotics & Autonomous Systems:** Autonomous Drone Development, Raspberry Pi Integration, Edge AI, Sensor Integration, GPS Navigation, Real-Time Computer Vision

## PROJECTS

**Krishi Sakhi V2.0 – AI-Powered Digital Farming Assistant** | *Python, Django, DRF, React.js, TensorFlow/Keras, Scikit-learn, Gemini API* 2025

- Built a full-stack AI platform for crop recommendation, plant disease detection, and farmer assistance using Django, React.js, and TensorFlow.
- Developed a CNN-based disease detection model achieving 81% test accuracy and integrated Random Forest-based crop recommendation using soil and weather data with geolocation-based recommendations.
- Integrated a Gemini-powered agriculture chatbot and secure REST APIs with JWT authentication for intelligent farmer support.

**CarPulse AI – Agentic Vehicle Service Management System** | *FastAPI, React.js, Postgresql, Scikit-learn, Docker* 2025

- Developed an AI-powered vehicle service management platform with automated logging, analytics, and interactive dashboards.
- Built an agentic AI system capable of executing backend tools through natural language commands and voice-based logging.
- Implemented ML-based service cost prediction with secure JWT authentication using FastAPI and React.js.

**EduTrack – College ERP & Academic Management System** | *Flutter, Dart, Firebase* 2025

- Developed a multi-role college ERP application for students, teachers, and administrators with secure role-based authentication.
- Implemented attendance tracking, marks management, and automated academic performance calculation systems.
- Built dashboard interfaces and scalable backend APIs for efficient academic data management and analytics.

---

**AerioAI Drone – AI-Powered Autonomous Delivery & Surveillance UAV | Python, Raspberry Pi, OpenCV, SpeedyBee F405 V5, BN-880 GPS, Gemini API, INAV** 2026

- Developed an AI-powered autonomous drone for intelligent aerial surveillance, object detection, object classification, smart payload delivery, and emergency response applications.
- Integrated Raspberry Pi 4, SpeedyBee F405 V5 Flight Controller, BN-880 GPS Module, 55A 4-in-1 ESC, 4114-11 320KV Brushless Motors, telemetry systems, and onboard vision pipelines for autonomous navigation and real-time decision-making.
- Built computer vision and AI workflows using OpenCV, Raspberry Pi Camera, and Gemini API, enabling real-time aerial scene understanding, object detection, classification, AI-generated scene summarization, and dashboard-based mission monitoring.
- Implemented GPS-based waypoint navigation, Return-to-Home (RTH), autonomous flight control, and intelligent mission execution through INAV-compatible flight systems.
- Designed a modular UAV architecture combining embedded AI, computer vision, autonomous navigation, and payload delivery capabilities for surveillance, monitoring, and smart logistics applications.

**CERTIFICATIONS**

---

**Oracle Cloud Infrastructure 2025 – Generative AI Professional | Oracle University**

**Oracle Cloud Infrastructure – AI Foundations Associate | Oracle University**

**IBM Artificial Intelligence Fundamentals | IBM SkillsBuild**

**IBM Data Science Fundamentals with Python & SQL | Coursera**

**Mathematics for Machine Learning – Imperial College London | Coursera**

**ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES**

---

**First Place – Machine Learning Quiz Competition | Unstop** 2025

- Secured 1st place in the Machine Learning Quiz Competition at Maharaja Institute of Technology Mysore (Aug 2025), organized by the Unstop Campus Ambassador Program.

**National – Level Conference Presentation | MIT First Grade College** 2026

- Authored and presented a research paper titled “CarPulse Agent” at the National-Level Conference on Frontiers in AI-Based Applications.

**Third Place – INNOVOTSAVA’S DRONEX | Stack Forge** 2026

- Secured 3rd place in the DroneX, Drone Technology Challenge at INNOVOTSAVA 2026 (June 2026), organized by the Stack Forge Club, Maharaja Institute of Technology Mysore.
